## Get acquainted with the New Boy

As you could already read in our latest newsletter, we took the opportunity at the Bauma fair in Munich to focus on our latest range of generators through the party's at our stand.

The introduction of the new super-silenced generator with Hatz diesel engine (see next news-

letter) and the New Boy was a huge success. This gives us a reason to dilate upon the many advantages of the New Boy!

His (or its?) compact design makes him easy to build in, he is simple to operate, easy to maintain and utmost suitable for intensive use. His solid and cast-iron

appearance hides an amazing silent power. Convince yourself and [click here](#) to hear the sound of this generator live!

### How great is the difference between LWA and dB(A), if there is a difference at all?

We get a lot of questions concerning the meaning of LWA and dB(A) and their relation. When we indicate a value in LWA, this is the equivalent of the dB(A) at 0 metres, which means measured straight up against the generator. On the other hand, when you want to express the sound level in dB(A), you always have to specify the distance.

For example:  $LWA\ 100 = 80\ dB(A)\ at\ 4\ m\ (so\ LWA-20)$   
 $75\ dB(A)\ at\ 7\ m\ (so\ LWA-25)$   
 $72\ dB(A)\ at\ 10\ m\ (so\ LWA-28)$

But how big is the difference in sound level between a standard 6kVA gasoline generator (LWA 100), a comparable silenced generator (LWA 95) and a super-silenced generator (LWA 90)? We are only talking about a difference of 5 dB! [Click here to hear the difference!](#) If you keep in mind that a reduction of 3 dB means for the human hearing a halving of what he really hears, we can say the difference is remarkable!

SDMO-ALSTOM-ANSALDO-CATERPILLAR-CUMMINS- EIPA -DISTRIGAS-ELECTRABEL-EURODIESEL-TRACTEBEL-NEDALO

ROLLS ROYCE-SIEMENS

[Power-Gen](#) takes place from the 29<sup>th</sup> till the 31<sup>st</sup> of May at the EXPO (Heysel) in Brussels (B). We participate through our associated company EIPA. Power-Gen is a world fair for power supply in the broadest sense of the word.

Free entrance cards can still be obtained at our company, just send an email to [info@europowergenerators.com](mailto:info@europowergenerators.com) or give us a call at +32.11.586161. See you at our stand F034.

GENERAL ELECTRIC-MTU

⇒ As you already noticed in our price list 2001, the type EPS1000 cannot be delivered any more. We are working on an alternative. Of course, we shall keep you posted.

### Attention!

The next dealer training shall not take place on Thursday the 31st of May but on Thursday the 7th of June. This technical-commercial training is always very useful. You can enroll by phone, email or fax +32.11.582838.

There are also trainings planned on 28/06, 26/07, 30/08 and 27/09.
